Workshop Details

Data Analytics

Experience how modern data analytics tools allow you to visualise and translate your Sage 300 data into meaningful real-time information and multidimensional analysis reports. Real-life case studies will also be shared to show how organisations have transformed their business with data insights.

GL Budgeting and Singapore GST

Enhance your Sage 300 experience with user-friendly automation and leverage on customisable templates for smart budgeting and forecasting.

Discover how our add-on tool for Sage 300 — Singapore GST App Manager — enables a hassle-free, paperless experience of filing Singapore GST returns accurately and in constant compliance with local regulations.

Exporting/Importing and Security & Control

Learn tips on how to integrate and automate system processes to get a complete view of your business for intelligence reporting.

Discover how simple and cost-effective it is to implement Sage 300 with different role-based security. Limiting data access and user interface customisation are just some examples of how you can tailor your security options.

Revaluation and Reconciliation

Learn how to correctly set up and perform revaluation of transactions different from your functional currency at the current exchange rate.

Discover how simple it is to perform bank reconciliation in Sage 300 with 'matching' rules. Understand what the monthly reconciliation process entails and never have to worry about mismatching bank transactions.
